Manpower Projection for the Security Services Industry Using the Labour Market Analysis (LMA) Approach

Methodology

The Labour Market Analysis (LMA) approach has been applied to manpower projection for Security Services Industry (SSI) in 2003, 2005 and 2007, 2009 and 2011.

- 2. The manpower projection for SSI is compiled based on the Input-Output (I/O) model which is a labor multiplier approach by deriving the relationship between the production of buildings and the number of workers required. In the I/O model, an industry is assumed to have fixed production coefficients (i.e. constant return to scale) over the short time span under consideration (say six months to under three years). To generate the employment effect, it is necessary to estimate a set of labor input requirements by determining the ratio of the production (or final demand) to the number of employees. The ratio, called employment coefficient, will represent the number of employees needed to produce a single unit of production.
- 3. The stocks of private¹ and public² residential flats & non-residential flats³ are taken to be the production. The forecast production of private residential and non-residential flats is provided by the Rating and Valuation Department while the forecast production of public residential flats is provided by the Hong Kong Housing Authority (HA) and the Hong Kong Housing Society (HS).
- 4. To generate the employment effect, it is assumed that 50.25% and 49.75% of the total manpower are working for residential flats and non-residential flats respectively. (This assumption is based on the distribution of the completion of the types of building in the period from 2005 to 2010). The manpower projection by job level is presented in Table 1-3 below.

(Sources: HA and HS)

¹ The stocks of residential flats in the private sector are measured by the number of flats. (Source: Rating & Valuation Department)

² The stocks of public residential flats are measured by the number of flats. The stocks comprise:

⁽a) Public rental housing (PRH) flats and interim housing (IH) provided by the Housing Authority (HA),

⁽b) Public rental housing flats and Senior Citizen Residences Scheme (SEN) flats provided by HS,

⁽c) HA subsidized sale flats sold under the Tenants Purchase Scheme (TPS),

⁽d) HA subsidized sale flats under the Home Ownership Scheme (HOS), the Private Sector Participation Scheme (PSPS), the Middle Income Housing Scheme (MIHS), the Buy-or-Rent Option Scheme (BRO), and the Mortgage Subsidy Scheme (MSS),

⁽e) HS subsidized flats under the Flat-for Sales Scheme (FFSS) and the Sandwich Class Housing Scheme (SCHS),

⁽f) HS Urban Improvement Scheme (UIS) flats.

From Q12002 onwards, HOS/MIHS/PSPS/BRO/MSS/TPS/FFSS/SCHS that can be traded in open market are classified as private permanent housing.

³ Non-residential flats include private offices, commercial, industrial / offices, flatted factories, specialized factories and storages. Its measure is <u>square m</u>. (Source: Rating & Valuation Department)
