

# 伍絮宜慈善基金慷慨捐款 助培育绿色专才

## Wu Jieh Yee Charitable Foundation injects new funding to support the nurture of green professionals

早前VTC获伍絮宜慈善基金捐赠港币500万元，支持THEi高科院「树艺学习及探索研究基地」(ARBLE)计划，在柴湾校园内设立室内教学中心，并成立绿色奖学金以表扬THEi高科院学生在与绿色产业相关的学位课程中取得优异表现，以辅助绿色行业成就专才。

教学中心将配备先进的攀树设施、AR/VR学习设备和安全设备，为VTC学生和相关从业员提供全天候的培训场地。THEi高科院将为此申请「研究配对补助金计划」，透过ARBLE计划为城市绿化发展及树木管理领域进行研究。园艺树艺及园境管理(荣誉)理学士(BSc HALM)课程主任张浩博士表示，BSc HALM已被教育局选定为应用学位课程先导计划的四个学位课程之一，ARBLE计划可有助提升VTC学生和从业员有关树艺管理的专业知识与技能，促进业界交流。

教育中心将命名为「伍絮宜树艺教育及研究中心」，预计于2023/24学年投入服务。

Wu Jieh Yee Charitable Foundation donated HK\$5M in October 2022 to support the Arboricultural Research Base for Learning and Exploration (ARBLE) Project of THEi. The donation will fund the establishment of an indoor education centre in THEi (Chai Wan) campus and the setting up of a Green Scholarship to recognise THEi students' outstanding performance in pursuing green-related degree programmes, paving the way to become green professionals.

The education centre will be equipped with advanced tree climbing facilities, AR/VR learning devices and safety equipment to provide an all-weather training venue for VTC students and in-service practitioners. THEi will apply for the Research Matching Grant Scheme to leverage the ARBLE project to conduct research on areas of urban greening development and tree management. Dr Allen ZHANG, the Programme Leader of the Bachelor of Science (Honours) in Horticulture, Arboriculture and Landscape Management (BSc HALM) programme said that BSc HALM was one of the four degree programmes selected by the Education Bureau for the Pilot Project on the Development of Applied Degree Programmes. He added that Project ARBLE will benefit VTC students and industry practitioners, enhancing their professional knowledge and skills in arboriculture and facilitating knowledge exchange.

The education centre will be named as Wu Jieh Yee Arboriculture Education & Research Centre and is expected to be in operation in 2023/24 Academic Year.
