

# VTC participates in Education and Careers Expo Promoting the value of VPET and empowering youth in future planning

VTC participated in the Education and Careers Expo 2026, held from 22 to 25 January at the Hong Kong Convention and Exhibition Centre. Under the theme “Opportunity in Hand, Future in Sight”, the VTC booth highlights the value of Vocational and Professional Education and Training (VPET) and showcased VTC’s diverse study and training pathways. Through exhibits, thematic seminars, and interactive activities, VTC presented the latest developments in VPET, demonstrating the distinctive features of its wide range of programmes, and teaching and learning outcomes.

## Innovative projects showcase VPET achievements

A key highlight of VTC booth was a collection of innovative projects developed by students and teaching teams. Among the featured exhibits was iPosture, an artificial intelligence (AI)-powered mobile application developed by students and teaching team from the Hong Kong Institute of Information Technology (HKIIT). The app uses AI and spatial audio technology to analyse users’ head and neck posture in real time, encouraging healthier everyday habits. Another highlight was “Choi Hung Dreams, Memory Streams” project, jointly developed by the Childcare, Elderly and Community Services discipline and the Engineering discipline of the Hong Kong Institute of Vocational Education (IVE), applies Building Information Modelling (BIM) and Virtual Reality (VR) technologies to recreate historical scenes of Choi Hung Estate, integrating technological innovation with community care. Also showcased was the AI Korfball Coaching Platform, a collaborative project between IVE’s Hospitality discipline as well as Technological and Higher Education Institute of Hong Kong’s (THEi) Department of Sport and Recreation.

These innovative projects reflect the outcomes of VPET, embodying VTC’s emphasis on integrating “think and do” approach and enabling students to apply their professional knowledge to address real world and community needs.

Secretary for Education Dr CHOI Yuk lin (fifth from the left in the back row) visits the VTC booth and speaks with VTC students to learn about how they put their knowledge into practice.

A range of innovative projects developed by student-teacher teams are showcased, demonstrating the VPET learning outcomes.

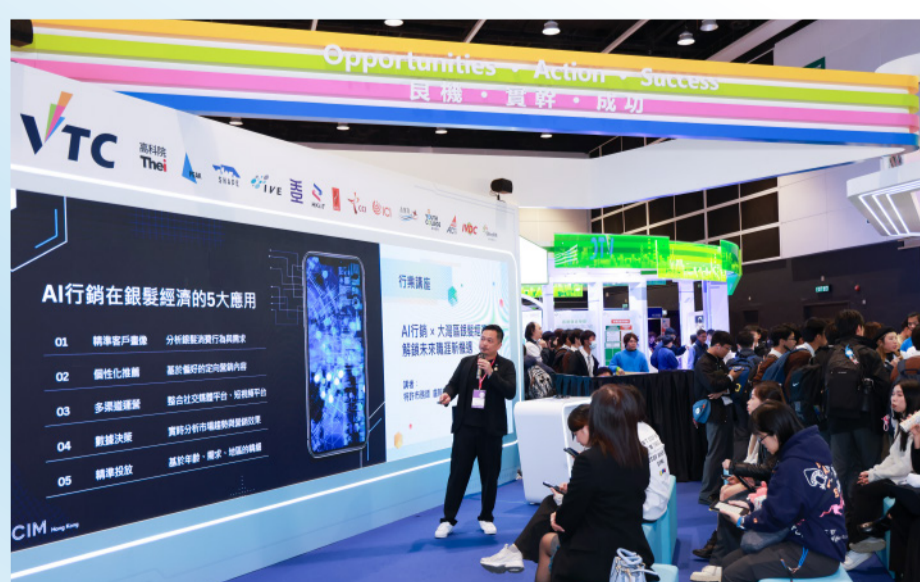

## Real time consultations support individuals in planning their future

In addition to showcasing innovative projects, VTC booth also featured consultation zones, where professional teams provided advice on further studies and professional development. Through on site consultations, visitors gained a more solid idea of their learning and career pathways, helping them plan for the future.

## Thematic seminars and hands-on activities well-received

During the Expo, VTC hosted a series of thematic seminars covering high demand areas such as artificial intelligence, robotics, new energy transport, and silver economy. Speakers shared insights on industry trends, talent needs, and future skillsets, enabling participants to stay informed about the latest developments.

A variety of hands on activities, such as pet massage demonstrations, sugar art creation and UX design, also drew strong interest, giving participants first hand experience of VPET’s practical training and a clearer view of the prospects across different professional disciplines.

A series of thematic seminars attracts strong attendance and helps participants keep abreast of the latest information.

The VTC booth also offers a range of skills demonstrations and hands on activities, giving participants a first hand experience of practical techniques across different professional fields.
